Dr. **MARTHA QUINTERO MORA**
Funcasol – U.S.A.

Greetings:

This is to certify all of us, including the Office of the Governor of Valle del Cauca, the Association of Mayors and the community at large, know about and think highly of the very important work being done by Funcasol USA and Funcasol – Colombia in the implementation of important social projects for the benefit of those populations that find themselves to be under a high degree of vulnerability and poverty. Among others, the delivery of state-of-the-art medical equipment has been imported from U.S. to Colombia. In addition, important programs have been implemented the area of healthcare, which directly beneficial to the communities living in Central Valle del Cauca, in portions of Southern Valle del Cauca and in Northern and Far Northern Valle del Cauca. Currently, with the equipment, among others, the equipment used in Digital Angiography which was the equipment that was bought out of our own resources of Funcasol Colombia, which was bought from the U.S. based company, Amber Diagnostics, which is headquartered in Orlando, Florida. Preliminary preparations are now being made for the construction Cardiovascular Center. Negotiations are currently under way with the management of the Tomas Uribe Uribe Hospital in Tuluá, which is located in the very heart of Valle del Cauca. Given the strategic location of this town, all roads lead there and that makes Tuluá very desirable for the implementation of this project,

The best Funcasol USA achievement so far is the approval of twenty million U.S. dollars, in a joint operation carried out between Funcasol-Colombia and an important English entity known as Teaco Holding Limited, headquartered in London and legally represented by Dr. Ghaddar. We have been invited to London to be present on August 20, 2009, during the final signing of the respective agreement, in order for funds to be released for the construction of low-income housing, healthcare and the agricultural and industrial sector projects sponsored by Funcasol Colombia. For this reason, we particularly point to the work being done by **Dr. Martha Quintero**, in her capacity as Funcasol USA President, which, alone, made the obtaining of important economic resources, to be used to improve the quality of life of thousands upon thousands of people Colombia.

In view of the above, we are currently extending a very special invitation to Dr. Quintero, in order to receive the funds in Colombia and for her to visit with us with Dr. José I. Mora. This occasion will give us the opportunity to present her with a tribute of recognition, thanks, admiration and respect and, before all, for her patriotism, by giving onto her, in an official and stylish way, her award as an Ad-honorem ambassador of Valle del Cauca in the United States of America.
